SUMMARY

Sound Designer with hands-on experience in interactive audio, implementation and collaborative game development. Focused on creating responsive sound that supports gameplay, player feedback and immersion, with a background in music and audio production.

PROJECTS

Slightly Burnt: A Goose Story *Lead & Technical Sound Designer*

04/2026 – 06/2026

- Led a four-person audio team, coordinating sound design priorities and communication with The Game Assembly development team.
- Created and maintained the project sound list, tracking assets, priorities, loop behaviour, implementation status and team ownership.
- Built and maintained a Wwise project with 200+ media assets, including Event structure, SoundBank generation, naming conventions and coordination of audio triggers with programmers.
- Designed and implemented interactive audio systems, including multi-stage cooking behaviours, audio ducking, distance-based attenuation, gameplay SFX and in-game testing.

Beyond the Bifrost *Sound Designer*

01/2026 – 03/2026

- Designed surface-dependent footsteps and landing sounds for snow, ice, stone and grass.
- Created climbing, movement and UI sounds, including hover, select, start-game and quit-game feedback.
